

Celeia

Use in brewing:

Dual purpose hop. This distinguished variety is well known and although identical to Fuggle in many ways it has its own distinctive characteristics. The perfume-like hoppy character used mainly in European lagers works well in the less malty flavoured, golden-coloured beers. Strong aroma, mild bittering.

Substitutions:

Fuggles

Origin/History:

Introduced into Slovenia from England it seems likely that the Fuggle variety was supplied under the misnomer of "Fuggles Goldings" - a practice at one time resorted to since Goldings were deemed to be of superior quality to Fuggles. Adopted by Slovenia in 1930 when their other varieties were exterminated by Powdery Mildew

Agtronomics:

It is a low to moderate yielding aroma variety that matures early to mid-season. It is susceptible to Downy and Powdery Mildew and particularly susceptible to Verticillium Wilt.

Storage:

Very good.

Floral, Lemon, Lime
