

# COMET

American

**Origin:** USA. Comet is a cross of English hops with a wild American variety and was first released in 1974. Commercial production actually ceased in the 1980s as it was phased out in favor of new super-high alpha varieties. Recently however, it has enjoyed a comeback thanks to its unique profile.

**Usage:** Intended as high-alpha bittering hop when first released, Comet has found a second life as an aroma variety in IPAs, wild ales, farmhouse beers, and other cutting-edge craft styles.

**Aroma & Flavor Characteristics:** Dominated by citrus zest and fragrant grassy character, with undertones of old-school earthy bitterness.

## SENSORY HIGHLIGHTS

**Citrus**  
**Earthy**  
**Grassy**

## BREWING VALUES

Alpha Acid Range: 9.0 - 12.0%  
Beta Acid Range: 3.0 - 6.0%
